Experience

Work Experience at Photography Assistant July 2015- September 2015

Work experience with a member of my family, whom has experience in photography and operated a part-time business in selling landscape, natural and photo-manipulated photographs commercial to retail and companies around the world and in local stores in Telford. Working as a photographer and assistant in editing and producing photographs. Working in cooperating and dealing with problems in location shooting and on the go photography. While also learning in skills in Photoshop and Lightroom in upgrading my skills in editing software. Looking after equipment and dealing the public when on location and learning communication skills.

Blogging Experience on New College's Student Blog November- July 2015

Working with other fellow students and staff at New College to bring entertaining and informative blogs about varies genres from television, photography or gaming. My job in the student blog was to lead the photography, gaming and co-lead the television section of the blog. Also meeting and discussing how to enhance the blog for example how to get more viewers with advertising and more interesting articles but also to portray more entertaining and informative posts that represent the college to get people involve. The experience was enlightening, and I took experience in advertising the blog and writing in-depth articles on subjects that mattered to me but wanting to insert terminology to my fellow students at New College Telford.

Work Experience at Teagues Bridge Primary School 1-12 July 2013

The work experience was to provide context and real-world experience on teaching in education with at the time I wanted to go into teaching in instruction at a school. Therefore, I chose to do work experience at my old primary school. My roles were assisting the teacher, doing one to one reading with students than giving advice on multiple things however mostly about secondary education to the year 6. I had to sort equipment, a print of work and awards for students. Listening and giving feedback to their plays and work so they can improve their work. I also on my first day I was entrusted to look after a group and be responsible for their action. Thus, I had to care for them and keep them safe and secure but also to educate them; helping and teaching a group of students' mathematics so they can work better on that subject matter.
